---

Don,

Illinois RR contractor CDM Smith is proposing to install 3 monitoring wells next week on the Rail Track Right of Way and the locations are listed in Figure 5 of the Feb 26, 2014 Site Investigation Report. I spoke to their project manager and they have a 4<sup>th</sup> location they are willing to install on the East site of the track right of way. Can you assist me in choosing a location for this 4<sup>th</sup> monitoring well. I was thinking East of GP-01 on the east side of the tracks along the right of way. I am attaching the full SI report from CDM Smith.

Let me know what you think.

Steve Faryan
